

# KAUFFMAN'S® Fortitude Canine Joint with Algal DHA

A Natural Algal Oil DHA and Flaxseed ALA Supplement for Dogs with Glucosamine Sulfate, Chondroitin Sulfate and Antioxidant Vitamins.

Feeding an adult dog this natural supplement will supply the conditionally essential Omega-3 fatty acids DHA (algal vegetarian source) and ALA (from flaxseed) to the diet; add benefit with glucosamine sulfate, chondroitin sulfate and the antioxidant vitamins E and C.

360 gram canister

One 5 g scoop for every 40 to 50 lbs. of body weight per day

# Fortitude<sup>®</sup> Canine

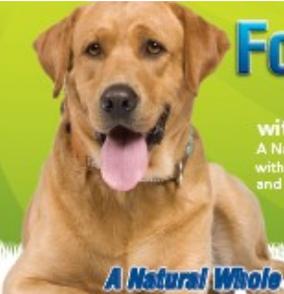

## Features:

- ◆ **Whole Ground Flaxseed** – supplies the functional Omega-3 fatty acid alpha linolenic acid (ALA).
- ◆ **Algal Oil** – a vegetarian source of the Omega-3 conditionally essential fatty acid DHA (docosahexaenoic acid). No fish or fish oil is used. The algae, *Cryptocodinium cohnii* is grown under controlled, sanitary manufacturing conditions. It is clean, safe, and free of ocean contaminants.
- ◆ **Glucosamine Sulfate and Chondroitin Sulfate**
- ◆ **Antioxidant Vitamins E and C**
- ◆ **Preserved with natural mixed tocopherols (vitamin E)**
- ◆ **No beef, wheat or soy**
- ◆ **Natural flavoring**

## Benefits:

- ◆ According to the National Research Council 2006, the conditionally essential Omega-3 fatty acid ALA helps modulate the inflammatory and immune response and promotes healthy skin and coat in dogs. Only a small amount is needed, but it may not be in your dog's current diet.
- ◆ DHA is a fatty acid involved in modulating inflammation in the joints and skin; it also is a structural component of neural tissue. DHA inhibits the production of COX-2 enzymes and competes with arachidonic acid for incorporation into cell membranes.
- ◆ Synergistic positive effect on joint nutrition, structure and function.
- ◆ Protect the joint structures from the cell damaging effects of free radicals.
- ◆ No chemical preservatives.
- ◆ No beef, wheat or soy products which are common causes of adverse food reactions in dogs.
- ◆ Proven palatability. (Summit Ridge Farms, 2009)

## Fortitude<sup>®</sup> Canine Joint™

**with Algal DHA**  
A Natural Whole Food Source of Algal DHA  
with Glucosamine Sulfate, Chondroitin Sulfate  
and Antioxidant Vitamins

**KAUFFMAN'S™**  
Net Weight 12.7oz (360g)

**A Natural Whole Food Supplement For Adult Dogs**
